## Phoenix

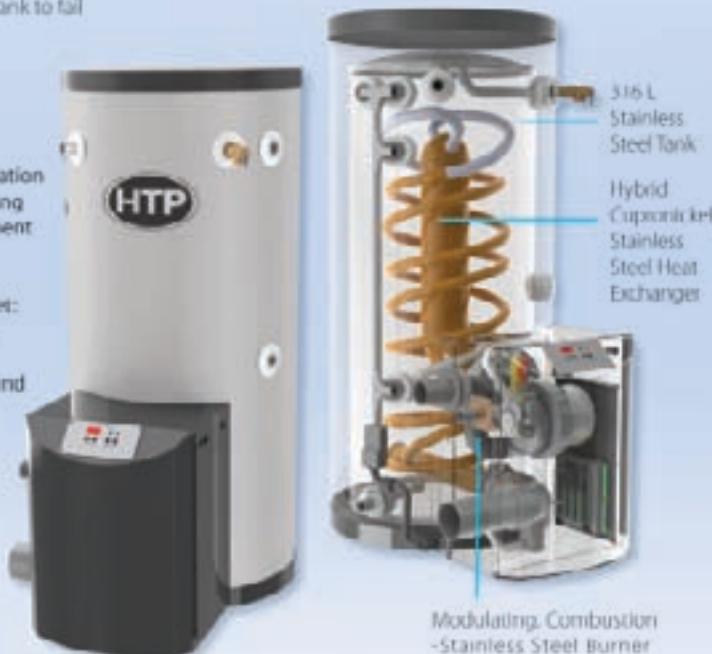

High Efficiency, Stainless Steel,  
Gas Fired Water Heater

Scale build up in a tank can cause a tank to fail in 2-3 years.

In a standard tank type water heater, lime scale builds up on important heat transfer surfaces, decreases thermal efficiency, and greatly increases operating costs and destroys a tank. The answer to this problem is the **Phoenix**, with the best stainless steel tank in the industry. Stainless steel tanks eliminate the need for anode rods and eliminates the scale build-up problem.

- Up to 96% Efficient
- 2" Foam Insulation Reduced Cycling Adds Component Life
- Whisper Quiet: 45dB at 5 ft.
- Commercial and Residential

COMMERCIAL WATER HEATERS

# COMMERCIAL SOLUTIONS

The Rheem SPIDERfire is the perfect solution for many restaurants, schools, hotels and laundromats looking for a highly efficient way of producing large volumes of hot water — it's sure to take a bite out of fuel costs:

- 95% thermal efficiency
- Six ultra high efficiency 100 gallon models
- Unique multi-pass heat transfer system
- Operates on natural gas or LP
- Ultra low NOx certified
- Single-pipe power vented or 2-pipe power direct vented
- Eye-level LCD scrollable electronic diagnostic system

Visit [Rheem.com/spiderfire](http://Rheem.com/spiderfire) today or your local independent Rheem distributor to learn more.

# Oatey

Our Lo-V.O.C. Cements  
Can Help You Qualify for LEED Points 

Oatey Plastic Pipe Cements, Primers and Cleaners are covered in LEED-NC 2.2 in the Indoor Environmental Quality Section, Credit 4.1, Low-Emitting Materials: Adhesives and Sealants. This section requires that these and similar products used in the construction of the building meet the requirements of South Coast Air Quality Management District Rule 116B.

Oatey Lo-V.O.C. plastic pipe cements and primers meet or exceed this requirement and therefore comply with the requirements of the LEED rating system. They are available in a variety of formulas, PVC, CPVC, ABS, Transition and All Purpose to meet a variety of plumbing applications.

## But Did You Also Know...

A minimal amount of packaging is used to insure Oatey products arrive safely to their end destination while avoiding excessive and unnecessary material consumption.

Our Distribution Center located in Cleveland, Ohio is LEED Certified and was built to reduce the impacts of natural resources consumption, reduce operational costs, enhance associate comfort and health and minimize strain on local infrastructures.

We utilize FSC approved paper stock for product labels to ensure our sources come from sustainable forests.

The cans that contain our solvent cements are made up of 63% recycled steel.

Visit our website [www.oatey.com](http://www.oatey.com) for more information.

4700 W. 192th St. Cleveland, OH 44135 800-321-9532 [www.oatey.com](http://www.oatey.com)

## Flush Green. Stay Clean. Every Time.

Save 25% more water with the new H<sub>2</sub>Option™ Siphonic Dual Flush Toilets.

Everybody wants to save water, but nobody wants to sacrifice a good, effective flush. The new H<sub>2</sub>Option™ Siphonic Dual Flush Toilets solve that dilemma by delivering a stronger, cleaner and quieter flush than typical dual flush toilets. Our patent-pending, siphonic-action technology provides exceptional performance in both 1.0 gpf light flush and 1.6 gpf heavy flush settings. The result? Cleaner bowl and improved water savings.

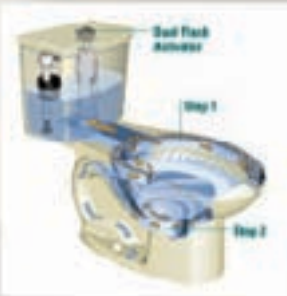

To learn more, visit us at [americanstandard.com](http://americanstandard.com).

*American Standard*  
Style That Works Better.

### Powerful at both light and heavy flush settings

- 1.6 gpf setting achieves maximum 1000g MaP score for bulk removal
- 1.0 gpf setting yields an impressive 400g MaP score for bulk removal
- WaterSense® listed

\*MaP testing performed by NSF International. MaP protocol outlined by National Council of Water Compliance.

### Two-Step Siphonic Action

- Step 1  
Pressurized PowerWash™ rim scours the bowl clean
- Step 2  
Jetted siphonic bowl action quickly and completely evacuates bowl contents

**For the fifth  
straight year,  
Bradford White  
is the tank water  
heater brand most  
purchased by  
professional  
contractors.  
And again,  
we are the most  
recommended  
brand.**

*"We made the switch to Bradford White almost 15 years ago when we started having problems with another brand. Our reputation depends on the products we recommend so quality and reliability are critical. We couldn't be happier. Bradford White is loyal to the plumbing profession. Their products and people are top notch." Kevin and Ryan Carney - Garney Plumbing - Heating - Cooling, Live Lexington, PA*

The results of the 2010 CLEARReport, an independent water heater study by Clear Seas Research, revealed that product quality, service, technical support, and the fact that Bradford White is not sold in retail stores were the most important factors to contractors when selecting a brand of tank type water heater.

And now our support for you gets even better. Bradford White has just opened a 24/7, factory-based call center.

This fully staffed technical service team is there when you need it, anytime day or night.

We're making it easy for you to be a Bradford White contractor.

# Don't sweat it. ProPress it!

## Why use Press Fittings over Sweat Fittings?

In the study below it took 50% less time to install a typical restaurant bathroom with ProPress over sweating fittings. This will allow for jobs to be completed quicker, on time or ahead of schedule.

### Press Fittings vs. Sweat Fittings

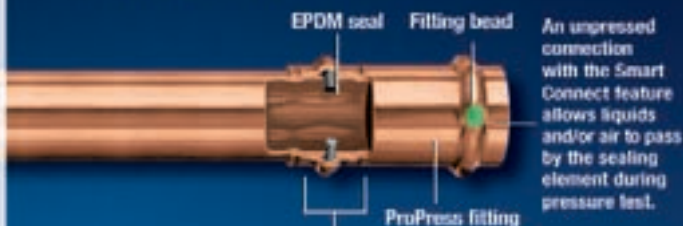

Only Viega ProPress fittings and valves offer the Smart Connect® feature, a quick and easy way to identify connections that need pressing.

During pressure testing, water or air flows past the sealing element indicating an unpressed fitting. The Smart Connect feature has assured millions of leak-free connections for water and gas applications. ProPress is approved for potable water, fuel gas, marine and stainless steel applications. Viega ProPress fittings carry a 50-year warranty for copper.

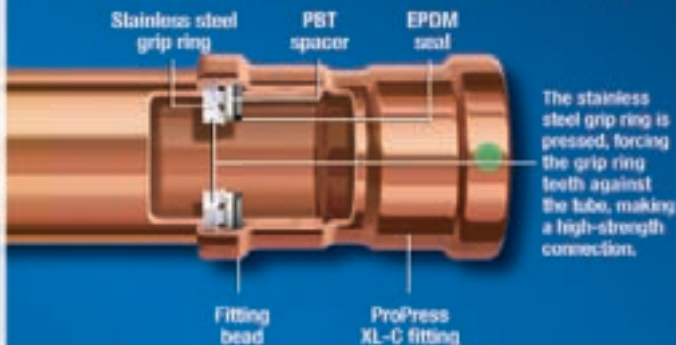

[www.viega.com](http://www.viega.com) | 1-800-976-9819

## ProPress 1/2" to 2" fittings.

Connection is pressed in front of, on top of, and behind the seal making a gas or water-tight seal. The Smart Connect feature is sealed during pressing.

## ProPress XL-C 2-1/2" to 4" fittings.

Press technology...  
The inside story.

# JG Speedfit®

The Push-Fit Solution For Plumbing and Heating Systems

Of course not.

Years ago no one knew the AB1953 Legislation was coming.

But we've **always** been in compliance, by keeping lead out of  
virtually all of our plumbing products

Can your fittings supplier say the same?

**JG John Guest®**
